The information typed in this section, will show up on search engines like this:

- i. **Title** – The title of your website.
- ii. **Keywords** - Including “keywords” on the main page can help your site be found more easily. A “keyword” is any term or phrase that a person types into a search engine to find what they are looking for. Simply put, Search Engine Optimization (or SEO) is achieved by adding key words and phrases to your site so that search engine “spiders” (or programs) find and catalog them for future use.
- iii. **Description** – Briefly describe your website, and highlight its contents.
