# Website Statistics:

The statistics will only show the number of hits to a page on your site. This hit counter does not retrieve visitor information, I.P. addresses, locations etc… The counter only reflects the number of times someone has clicked on a specific link. This counter does not provide information on forms that have been filled out and submitted by visitors.

**i.** Start by clicking the “My Website” tab.
**ii.** Click on “Website Statistics”

**iii.** See the page visited by page name & number of hits.
**iv.** Reset the counter to zero by clicking “Reset Page Counters”
